

Siemens Gigaset C590 DECT IP Phone

reddot design award
winner 2009

Main Features

Busy lives demand a reliable, well-equipped telephone. The Gigaset C590 features a best-in-class, large TFT colour display, an easy-to-use modern user interface and brilliant sound quality with HSP. For even more convenience and simplicity in daily telephony, it features programmable VIP ring tones and a talk time of up to 12 hours. The Gigaset C590 offers the perfect fusion of quality technology, refined design and easy-to-use features

The Gigaset C590 has a harmonious form and glossy exterior in black and white piano lacquer. The colour spectrum of the icon-aided menu on the 1.8" TFT display (65,000 colours) has been tuned to the colour of the device. When users dial, the numbers are shown in a particularly large size; if desired, a larger font size can also be set. The combination of high-quality design and excellent ease of use convinced the Reddot jury to bestow the "Reddot design award 2009".

The Siemens Gigaset c590 allows for new possibilities in caller and contact management. They can store up to 150 entries (including three phone numbers and e-mail address), which can be organized in six different VIP groups and assigned different ringtones and colours for individual callers. The last 30 incoming calls are always registered in the call list, along with the time of the call (CLIP/CNIP). The selective call blocking feature means that users are not disturbed by anonymous calls; those from suppressed or unknown numbers are no longer signalled acoustically, but are merely shown on the handset's display.

Navigate effortlessly

Find the features you need with ease on the large, high-quality TFT colour display, which is also equipped with a modern user interface. And the jumbo font size ensures you'll easily find the correct numbers in your personalized phone book or comfortably text message to friends and family using the SMS² feature.

Brilliant sound quality

Enjoy clear and comfortable conversations with the Gigaset C590. This attractive and reliable phone contains HSP for all your calls in brilliant sound quality. This Gigaset technology delivers clear, crisp voices free from annoying hissing or distortion with every call.
